Elevate Your Neonatal and Pediatric Transport Expertise

Join the **3rd European Neonatal and Pediatric Transport Course** and gain cutting-edge skills in neonatal and pediatric critical care transport. Over two days, learn from leading international experts, participate in hands-on sessions, and tackle real-world scenarios through high-fidelity simulations.

Transform your approach to transport medicine and become a leader in this vital field.

Be inspired, gain skills, and be ready to make a difference.

Venue

PCCB Auditorium, SJD Barcelona Children's Hospital
Calle de Santa Rosa, 39-57 08950 Esplugues de Llobregat (BCN)

Registration Fees

Doctor: €600

Nurse: €400

After this training you will be able to:

Learn how to handle the logistical aspects of transportation, including preparation, planning, and communication.

International context of neonatal and pediatric transport medicine.

Identify and manage the most common pathologies and their complications in neonatal and pediatric critical care transport.

To become familiar with transport equipment and be able to troubleshoot problems that may arise.

Develop an understanding of specific adaptations needed for aeromedical retrievals.

Practice the skills and competencies required for transportation through practical sessions and high-fidelity simulations.
